

**Summary of Appscript with GenAI sharing in GDG :
30min**

What is Apps script?

- Similar to Excel macro but more powerful
- javascript equivalent syntax
- Fully integrated the full Google Workspace ecosystem
- Fully integrated the full GCP ecosystem
- Fully compatible to more RESTFUL API (include openai and claude)

What are the other options?

- Zapier (no code)
- n8n (no code)
- Agentic frameworks (Swarm, Autogen)

Appscript is the best tool for GWS related automation

- Free
- Totally compatible with the Google eco system
- Avoid security blocking from Google such as CORS
- Google Authentication integrated
- Easy to deploy and no UI are required to build
- with GenAI, almost no-code (Text to script)

What can App scripts do?
